

ZENITH MEDIA

WELCOME TO THE CLOUD

ZENITH MEDIA

OUR HUMBLE
BUSINESS

WHO ARE WE?

We are a team of qualified individuals, who are working hard to build a high tech cloud service for its clients.

With over 14 years in business, we have the experience in building high-end managed servers allowing us to be a leader in the managed cloud sector.

Our dynamic and diverse staff are trained in the technical field and pride themselves on their knowledge and expertise.

OUR TEAM <3

WHAT MAKES US SPECIAL

We are an agile company taking on projects for customers worldwide, from Montreal, Quebec to Shenzhen, China and everywhere in between.

Our success is in our global reaching infrastructure, partnerships with leading tech companies and state of the art automation.

This methodology allows a small team to manage massive infrastructure with ease, consistency, and replicability.

We're a small team with big tools

SERVICES

OUR PRODUCTS
AND SERVICES

DEVELOPMENT

Code creation

- ▶ Working with you to create a coding project based on your needs

Code optimization

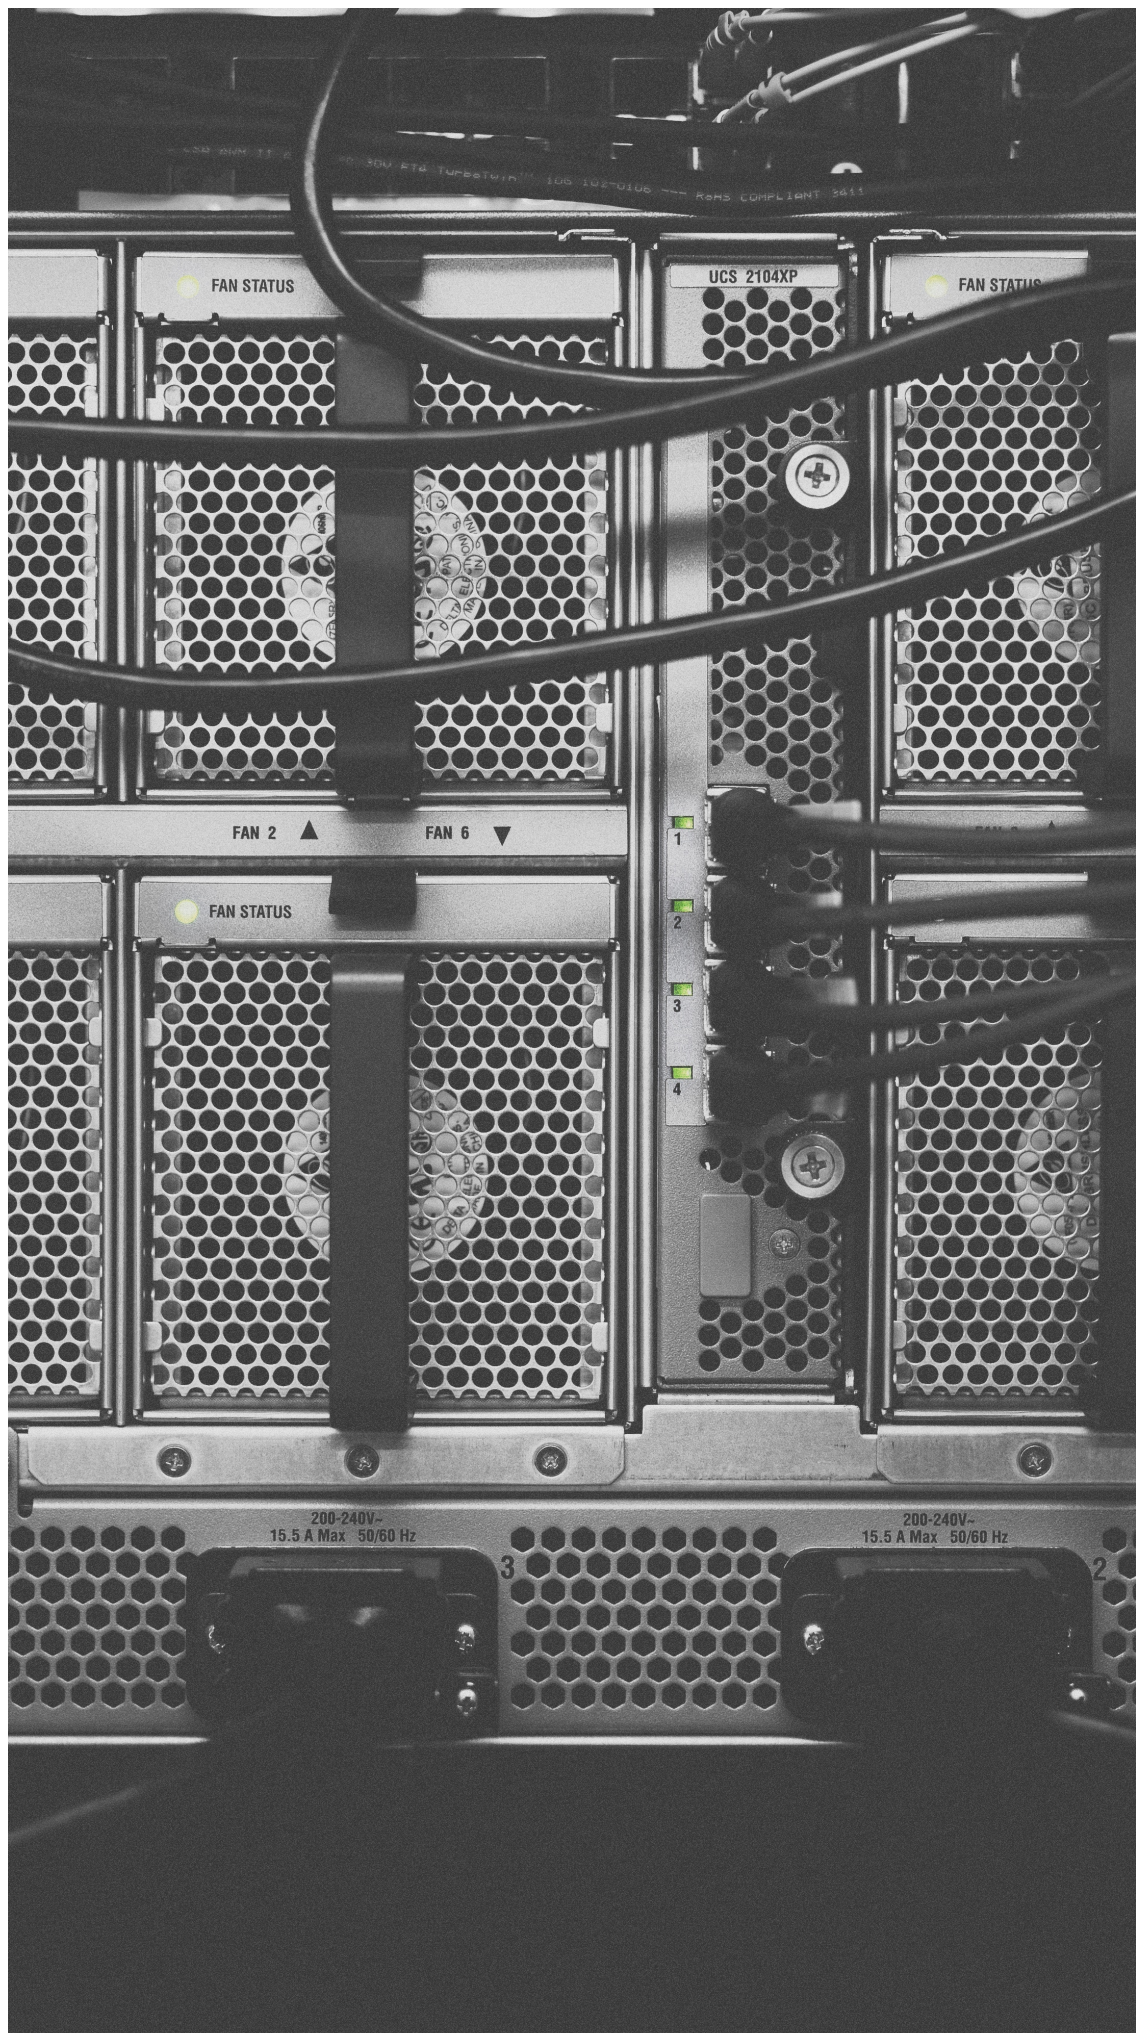

- ▶ We look at your existing code and optimizing it for speed and performance

Languages

- ▶ We speak many languages from Python to HTML and everything in between

Platforms

- ▶ We have experience working with multiple platforms based on popularity like Django, Grav and OpenERP

INFRASTRUCTURE

OUR CORE

HOSTED INFRASTRUCTURE

Hosting

- ▶ Top of the line cloud based website hosting with over 4 million hits on our platform (2017).

Domain Names

- ▶ We have access to all domain extensions, local or globally (.ca/.com/.business/.physio)

Domain Name System (DNS)

- ▶ Global DNS infrastructure in Canada, United States, Europe with over 50 million requests served (2017)

Hosted E-Mail

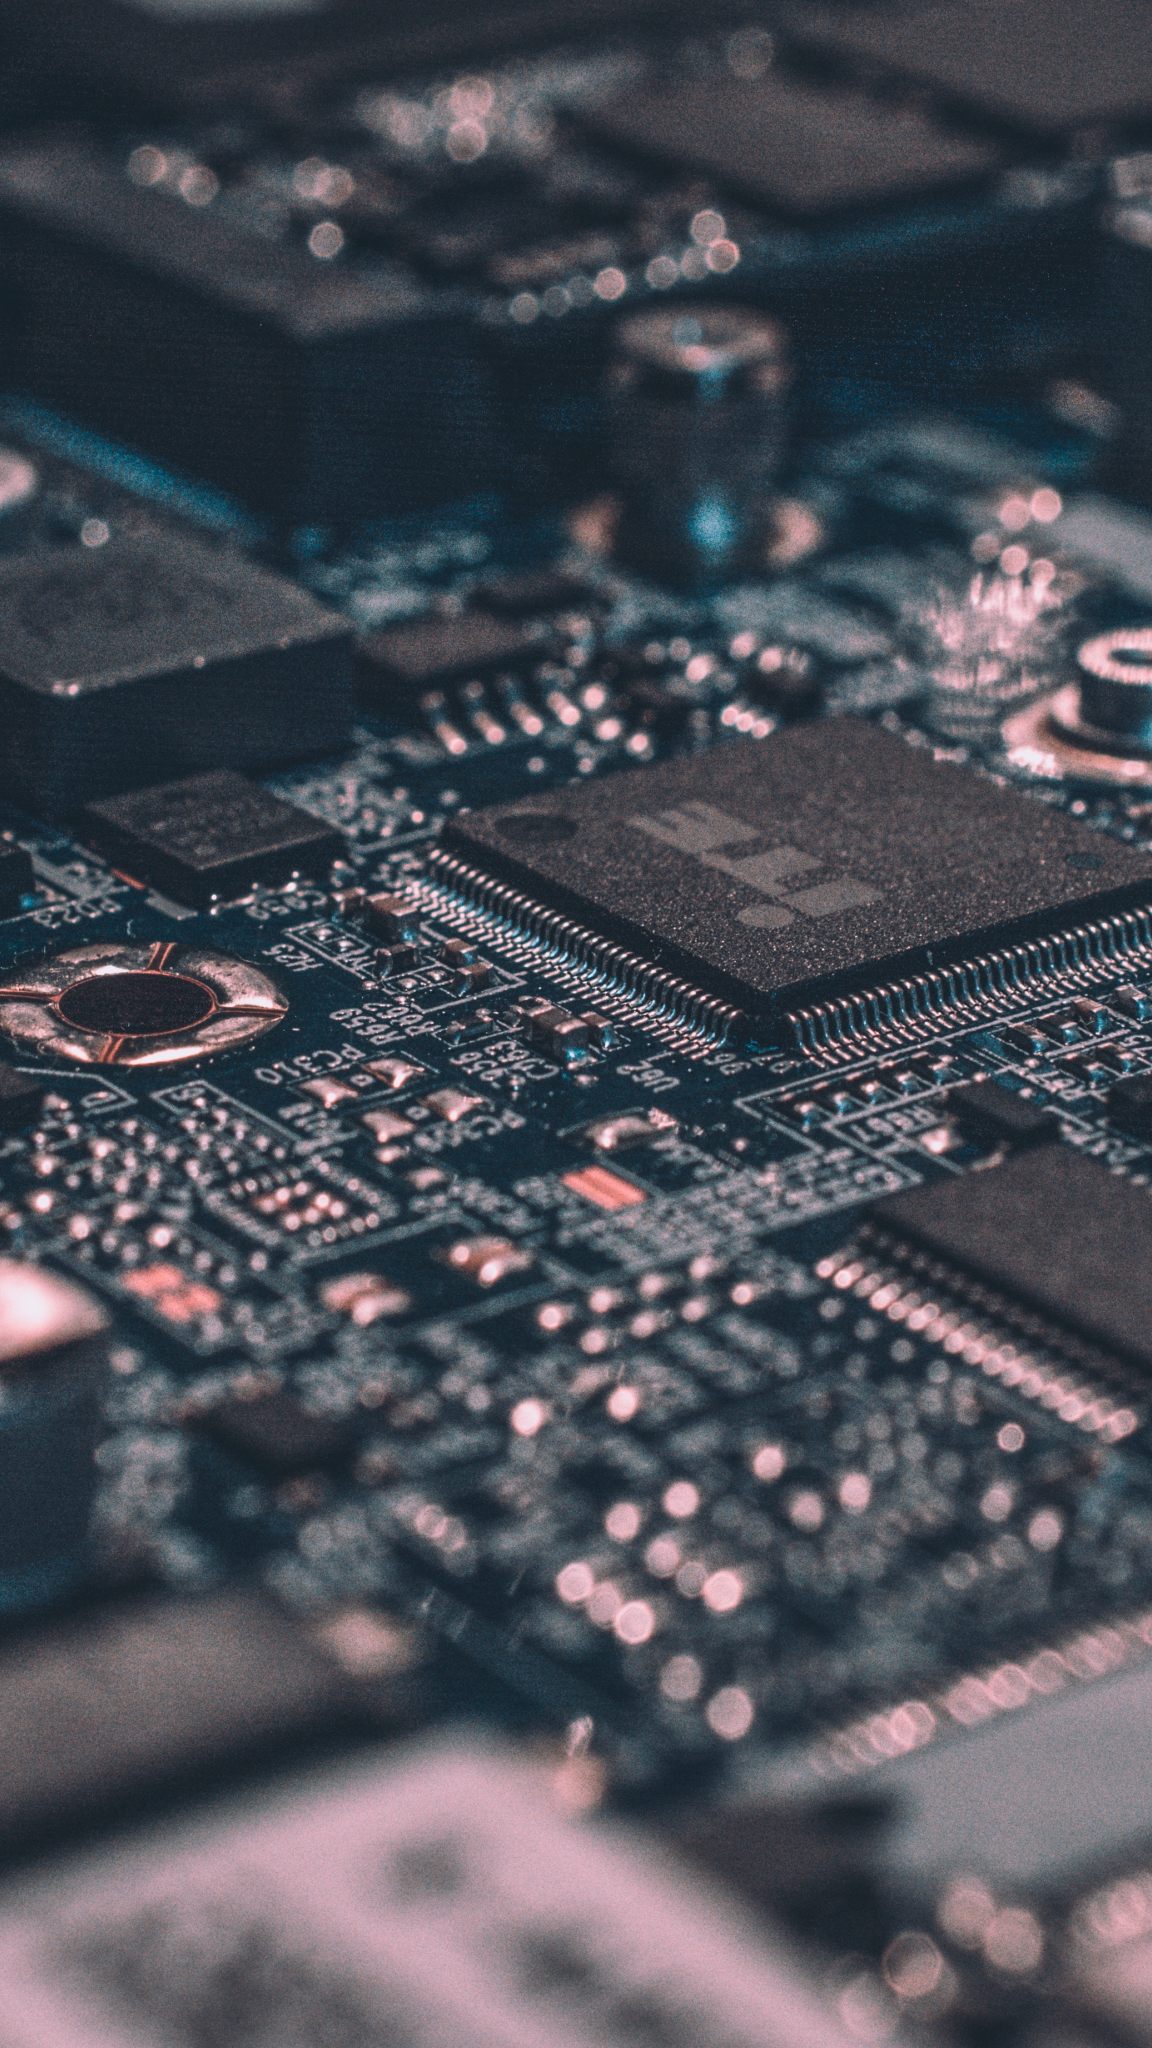

- ▶ Our hosted email offers guaranteed delivery, monitoring and top of the line security (SPF/DMARC/DKIM)

Spam Filtering

- ▶ Scanning of all incoming and outgoing email with 1.8 million virus rules, multiple ip reputation protecting you from spam and viruses with over half a million emails scanned in the last 8 months

Backup MX (cPanel)

- ▶ Email redundancy for cPanel systems, never loose an email due to downtime with 7 days of backups

DEDICATED

CLOUD SERVERS

CLOUD SERVERS

Server Management

- ▶ We manage and monitor your servers 24 hours a day 7 days a week, using internal and external tools

Scalable

- ▶ Sizeable and configurable based on project and projected requirements, from 1 CPU and 4 GB of ram to 36 CPU and 128 GB of ram with 20 terabytes of storage

Security

- ▶ Sharing of security information allowing the proactive protection cluster wide, if one of our clients gets attacked then all our servers share the information protecting them 24/7 with internal and external protection

Redundancy

- ▶ Triple replication on data, load balancing options and a huge cluster of servers backing our cloud

Extra Benefits

- ▶ Having a dedicated cloud server gives you access to our hosted infrastructure services and includes them with each server

ZENITH

CONCLUSION

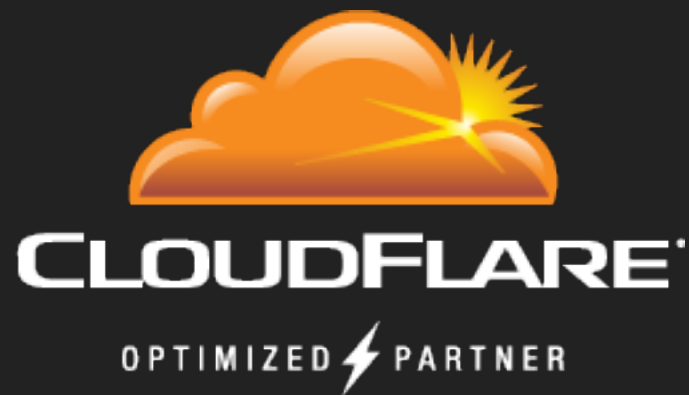

CONCLUSION

- ▶ We can solve your technical issues by unifying your projects under one technical roof
- ▶ We think we would be a great fit for you and your company, we have the technical skills and would love a partner that has the sales and customer service side perfected
- ▶ We are a word of mouth business growing with reputation but would love to join forces with a marketing expert, growing mutually is our goal
